

You Can't Train Smarter AI on Data You Can't See

Before your data can power AI, you need to know what you're working with. The problem? You didn't sign up to be a data janitor. Over 80% of enterprise data is unstructured—scattered across cloud drives, file shares, and forgotten on-prem systems.

Aparavi Baseline is your free first step to AI-ready data. Get full visibility into your unstructured data—classify it, assess it, and clean it up—before it ever hits your AI workflows.

Less Artificial. More Intelligent.

Training AI models on bad or messy data doesn't just waste time—it skews results, introduces risk, and blows your scope. Baseline helps you keep your AI focused and your project on track:

- ✔ Understand what you have before building pipelines
- ✔ Discover dark data hiding in forgotten folders
- ✔ Uncover the data worth training on (and ditch the rest)
- ✔ Built-in OCR and pattern recognition unlock value from non-text content
- ✔ Spot compliance risks, redundant junk, and forgotten files
- ✔ Get a centralized, searchable inventory—instantly
- ✔ Structure your data for high-impact use, not high-cost rework

With support for over 1,600 file types, including PDFs, audio, video, and images, it reveals exactly what you're working with.

AI Readiness Starts with Structure

You can't feed garbage to an LLM and expect magic. Baseline gives you the insights to prep smarter:

- Tag and classify by content, sensitivity, and relevance
- Spot risk—from exposed PII to compliance landmines
- Eliminate bloat—like outdated or duplicated files
- Surface high-value data to train cleaner, more accurate models

From Discovery to Direction

Baseline isn't just a scan—it's a strategy. Your data audit results in actionable insights, so you can:

- Prioritize cleanup and prep efforts
- Plan AI pipelines with context
- Avoid wasteful cloud migrations or training on the wrong data
- Build trust across teams with transparent, traceable insights

✔ No Guesswork. Just Clean, Contextual Data.

Start with Baseline to stop making assumptions.
No cost. No code. Just clarity.
